

Release 1.1.0

Features:

- **WICORE-710 - Updated Translation for "Items" in Categories Module**

- The term **"items"** in the **Categories module** has been changed to **"item(s)"** for better clarity.

- **WICORE-621 - Implemented Orders Markup (Frontend)**

- Developed the **markup** for the **Orders module** in the marketplace frontend.

- **WICORE-592 - Updated Goods Model: "Status" → "isActive"**

- The **"status"** property in the **goods model** has been renamed to **"isActive"** for improved data consistency.

- **WICORE-556 - Implemented Products Markup (Frontend)**

- Developed the **frontend markup** for the **Products module** in the marketplace.

- **WICORE-555 - Implemented Categories Markup (Frontend)**

- Developed the **markup** for the **Categories module** in the marketplace.

- **WICORE-744 - Configurations Module - Project Chaining & Clone Functionality**

- Removed unnecessary tabs and introduced **project chaining with a clone feature** in the **Configurations module**, streamlining project management.

- **WICORE-702 - Payment Systems Module**

- Implemented a **new Payment Systems module**, replicated from **Core Banking**, ensuring consistency and seamless integration.

Bugfixes:

- **WICORE-784 - Marketplace MS UI - Snyk Fix for 4 Vulnerabilities**

- Addressed **4 security vulnerabilities** in the **Marketplace Microservice UI** using **Snyk**, enhancing security and reliability.

- **WICORE-806 - Fix Access Issue to CreateOrder Resolver**

- Resolved a permissions issue where some users could not access the `CreateOrder` resolver in the Marketplace module due to missing or incorrect access configuration.
