

Release 1.9.0

Features:

• **WICORE-712 - Prevent Deletion of Referenced Products**

- Previously, products could be deleted even if other products referenced them.
- Now, an **error message** appears, requiring users to remove dependencies before deletion.

• **WICORE-709 - Standardized Actions Column Width**

- The **Actions column** in the **Actions module** and **Clients submodule** is now set to **100px** for consistency.

• **WICORE-682 - Added Delete Functionality for Actions in the Actions Module**

- Users can now delete **actions** directly in the **full Actions module**.

• **WICORE-631 - Pre-Call Notifications**

- Users now receive notifications before **Call events** at **15 min, 30 min, 1 hour, and 24 hours**.

• **WICORE-620 - Call Notifications with Countdown**

- Notifications now display when a **call is about to start** or in how many minutes/hours it will begin.

• **WICORE-619 - Improved Employee Event Notifications**

- Employee notifications now include:
 - **Client name**
 - **The exact call time and date**

• **WICORE-609 - Wider Client Info Drawer**

- UI adjustments make the **Client Info Drawer** wider and more user-friendly.

• **WICORE-603 - New Clients Actions Module**

- Introduced a **dedicated client actions module**.
- Users can **view, filter, sort, and create actions** in a separate table.

• **WICORE-602 - Added Delete Functionality for Client Actions**

- Users can now **delete** client actions.

• **WICORE-601 - Display Full Name in Client Actions Creator Field**

- The **Creator** field in **Client Actions** now displays the **employee's full name** instead of an email.

• **WICORE-596 - New Calendar Tab in Employee Module**

- A **Calendar tab** was added to the **Employee module**.
- Employee tabs are now separated into "**General**" and "**Calendar**".

• **WICORE-707 - Hide Actions Table in Client Drawer if User Lacks Permission**

- If a manager **does not have access** to the **Actions module**, the **Actions table** is now **completely hidden** in the Client Info Drawer.

• **WICORE-703 - Updated Translations and Text Fixtures on Container Reload**

- The **approach** to storing **translations and text fixtures** has been revised. However, **automatic updates on container reload** have been postponed.

• **WICORE-680 - Improved Layout for Empty Tables**

- Previously, if a table was empty, the "**Add**" button appeared alone at the top. Now, a "**Total: 0**" label is displayed to maintain layout balance.

• **WICORE-598 - Show Full Name and ID in Client Info Drawer and Edit Form**

- The **header** of the Client Info Drawer and the **Edit Form** now display both the **Full Name** and **ID** of the client for better clarity.

• **WICORE-640 - Unified Date Format Across the Project**

- Standardized the **date format** across all modules to ensure **consistency** and improve user experience.

• **WICORE-607 - No Data Displaying in Tables**

- Updated table behavior: when no data is available, the **table structure with column names remains visible**, and a **"No data to display"** message appears inside the table instead of removing the entire structure.

• **WICORE-841 - Adjust Actions Drawer Width**

- Increased the drawer width for actions and switched to percentage-based sizing for better responsiveness.

• **WICORE-808 - Marketing Solution**

- Implemented the initial version of the marketing solution.

• **WICORE-524 - Buckets: FTD Postback Support**

- Added support for handling FTD (First Time Deposit) postback in the buckets module.

• **WICORE-811 - Add "Additional" Field for Project (String - JSON Editor in UI)**

- A new field was added to the project model. In the UI, this field is displayed as a JSON editor for flexible structured input.

• **WICORE-810 - Add Project Create Open API Endpoint**

- Introduced an Open API endpoint for creating projects via external systems.

• **WICORE-809 - Add Employee Create and Edit Open API Endpoints**

- Added Open API endpoints for creating and editing employees, enabling external integration and automation.

Bugfixes:

• **WICORE-729 - Fixed Action Date & Client Search Issues**

- Resolved inconsistencies between the **Actions module** and the **Clients tab**. Fixed an issue where searching for a client during action creation did not work correctly.

• **WICORE-719 - Fixed Issues in the Requests Tab in Clients**

- Adjusted the **action column width** in the **Requests tab** of the Clients module.
- Fixed an issue where the **"Drop Filters"** button was not displayed.

• WICORE-708 - Root User Can Now Delete Actions

- The **delete button** for **actions** is now visible and accessible to **root users**.

• WICORE-706 - Fixed HTML Rendering in Security View Drawer

- Previously, **HTML tags** were incorrectly displayed in the **Incident Reports module**.
- Now, **dangerouslySetInnerHTML** is used for proper rendering.

• WICORE-688 - Fixed Missing Call Events in the Main Calendar

- Call events now correctly appear in the main calendar.

• WICORE-773 - Fixed Search Input Issue for Clients Across the System

- The dropdown in the **search input** for clients was not displaying content despite receiving the correct data. This issue has been resolved.

• WICORE-771 - Fixed Unauthorized Access to Clients

- Managers with "**View Own**" rights and "**Manage All**" rights for projects and desks could access clients via **direct ID input in the URL**, even when they lacked permission. This has been fixed.

• WICORE-761 - Snyk Fix for 55 Vulnerabilities (UI)

- Security vulnerabilities in the **UI** have been addressed using **Snyk**.

• WICORE-760 - Snyk Fix for 30 Vulnerabilities (Facade)

- Security vulnerabilities in the **Facade** layer have been patched with **Snyk**.

• WICORE-734 - Fixed Data Persistence in Create Action Drawer

- When a manager edited an **Action** and immediately created a new one, the **previous action's data** remained in the **Create Action Drawer**. This issue has been fixed.

• WICORE-730 - Standardized Filters in `/requests` Open API Method

- Filters in the `/requests` Open API method have been standardized to function **consistently** with other request endpoints.

• **WICORE-848 – Removed Unnecessary Bottom Padding in Drawers**

- Reviewed all drawers across the project and removed redundant bottom padding where it wasn't needed, improving visual consistency and space efficiency.

• **WICORE-857 – Fix Drag-and-Drop for Roles When Moving to Lower Positions**

- Fixed an issue where items couldn't be dragged to the very bottom of the list in the roles module. They would stop one position before the end.

• **WICORE-856 – Fix Pagination Behavior in Add Members Drawer**

- When adding members in a paginated view, if the current page became empty after the addition, the drawer now correctly navigates back to the previous page instead of showing "no data to display".

• **WICORE-853 – Add Translations for Clients Agreements Tab**

- Added missing translations to the client agreements tab.

• **WICORE-851 – Client Area Documents: Add Ellipsis Overflow for Columns**

- Applied text truncation with ellipsis in table columns to handle long text entries.

• **WICORE-850 – Fix Banner Component Rendering Issue**

- Resolved occasional rendering issues with the banner component.

• **WICORE-847 – Show Selected Project in Sidebar Project Select**

- Ensured the currently selected project is always visible in the sidebar project selector.

• **WICORE-840 – Fix Character Encoding for Client Export**

- Fixed encoding issues during client export that caused Cyrillic characters to display incorrectly in the exported document.

- **WICORE-836 – Fix Rights Chaining and Restriction Issues**

- Resolved several logic errors related to chained rights and permission restrictions in the roles module.

- **WICORE-835 – Fix Visibility Issue When Client Isn't Assigned to Desk**

- In core banking, a bug was fixed where access restrictions didn't work correctly if a user had no desk assigned. Now, the system shows "View of the client restricted by permissions" as expected.

- **WICORE-834 – Fix Rendering of Bucket Snippet Block**

- Fixed an issue where the snippet block in the buckets module wasn't rendering properly.

- **WICORE-833 – Fix Display Issue with Long First and Last Names in Client Form Header**

- Handled layout issues caused by long names in the header of the client form.

- **WICORE-829 – Fix Displaying Requests with Certain Rights**

- Resolved permission-based visibility issues when displaying certain requests.

- **WICORE-824 – Standardize Dates in Requests Module**

- Applied a unified format for date display across the entire requests module.

Revision #12
