

1. Commerce Hub: Overview

The **Commerce Hub** section is your central hub for managing the ecommerce components of your platform. It includes Offerings, Orders, Configurations (order statuses), Categories, and Payment Methods—each tailored to support project-scoped setups and rapid cloning.

Overview

1. **Scope:** Everything under **Commerce Hub** in the left nav—Offerings, Orders, Configurations, Categories, Payment Methods.
2. **Project-Scoping:** Many pages let you choose a project context (via pills or dropdowns) so each project can have its own settings.
3. **Clone Support (Configurations):** Quickly copy order-status setups from one project into another.
4. **Unified UI Patterns:** List views with Total, Filter pane, Search bar, and a +Add button; side-panel forms for create/edit; inline actions for edit/delete.
