

11. How to Delete an Affiliate Hub

When an affiliate hub is no longer needed, you can permanently remove it. **Be careful**—deleted affiliate hubs and all their configuration (sources, postbacks, snippets, automation rules, and leads) cannot be recovered.

To delete an affiliate hub:

1. **Open the affiliate hub's menu:** In the **Affiliate Hub** list, hover over the affiliate hub you wish to delete and click the **three-dot (•••)** menu in its top-right corner.
2. **Select "Delete":** From the menu, click **Delete**.
3. **Confirm deletion:** A confirmation dialog will appear. Confirm that you want to delete the affiliate hub. Once deleted, it cannot be restored.

Warning: Deletion is permanent. Make sure you no longer need any data or configurations associated with this affiliate hub before proceeding.
