1. Streams Section: Overview

The **Streams** feature in Wifox Business Content Solution allows administrators to integrate and manage event streams from external databases or admin panels using specified endpoints and join keys. This functionality is particularly useful for pulling event data into a centralized system for further actions like copying or language-specific adjustments.

Benefits

- **Centralized Integration:** Streamlines data management by importing events from various external sources.
- **Language-Specific Adaptation:** Allows copying and editing content for different language settings.
- **Simplified Management:** Enables quick editing and deletion of streams directly within the interface.

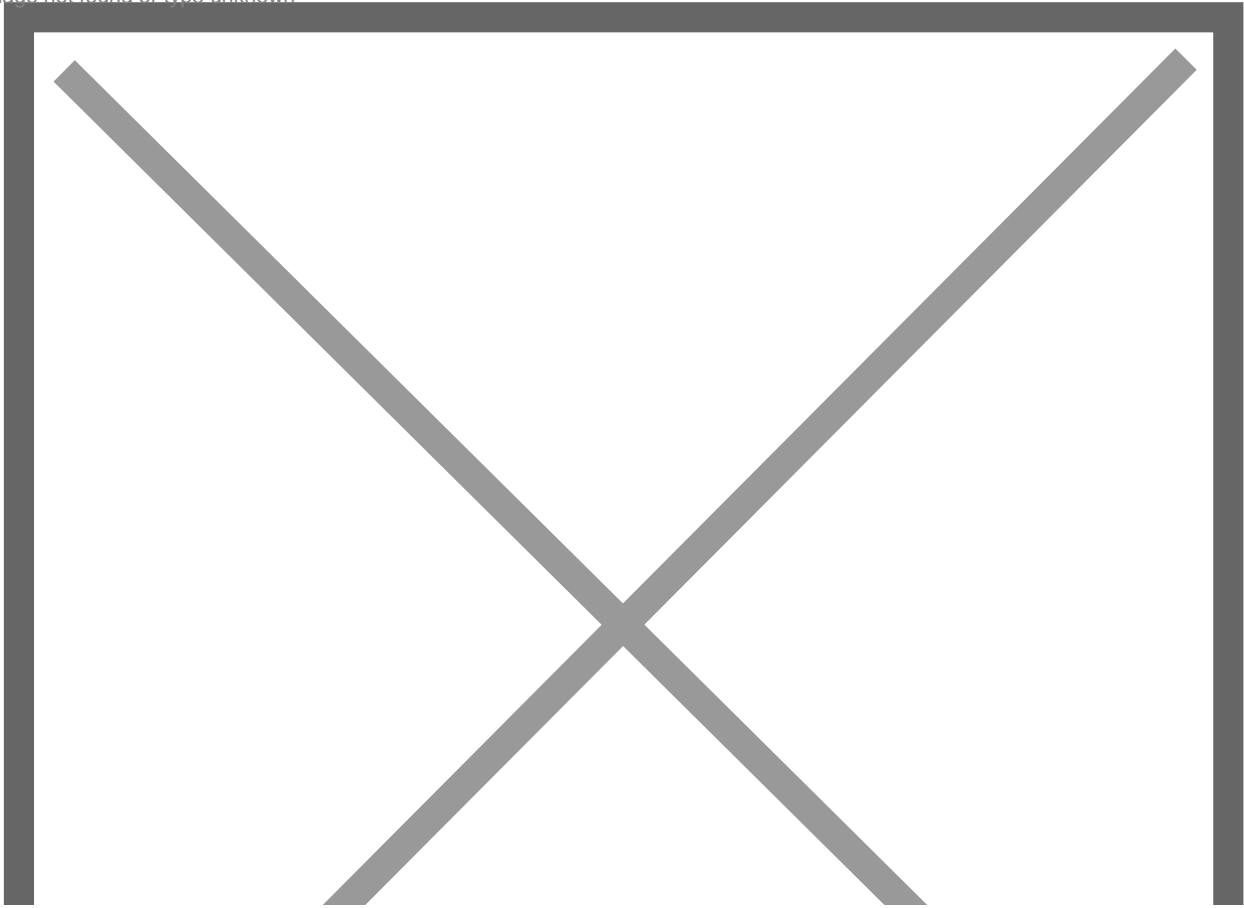

This section ensures that administrators can efficiently handle event data across multiple platforms, providing a seamless workflow for integrating external content into Wifox Business Content Solution.

Key Features

1. Adding a Stream

Use the **Add Stream** button to create a new stream.

Image not found or type unknown

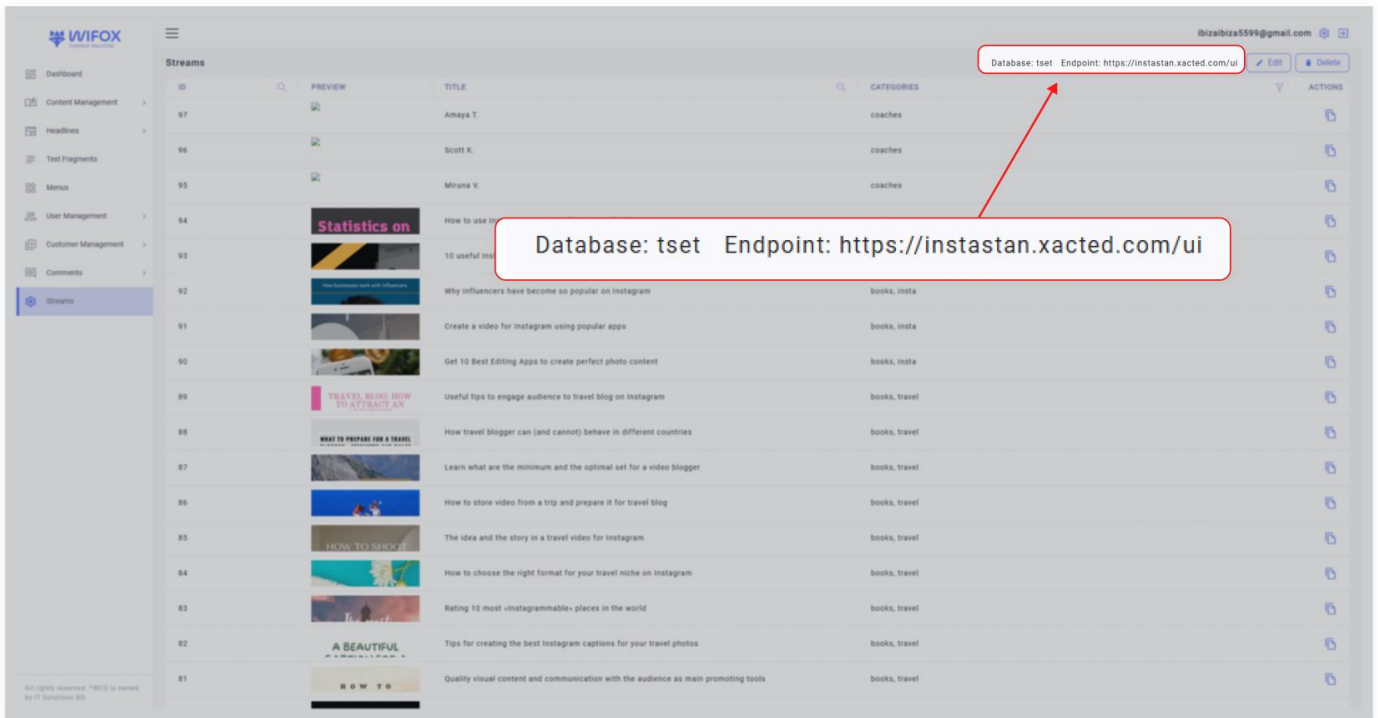

Fill in the required fields:

- **Stream Name:** Use lowercase alphabets only for naming (e.g., "investments").
- **Endpoint:** Specify the URL where the events will be pulled from.
- **Join Key:** Paste the unique key provided by the external admin system.

Click **Submit** to save the stream.

2. Managing Stream Data

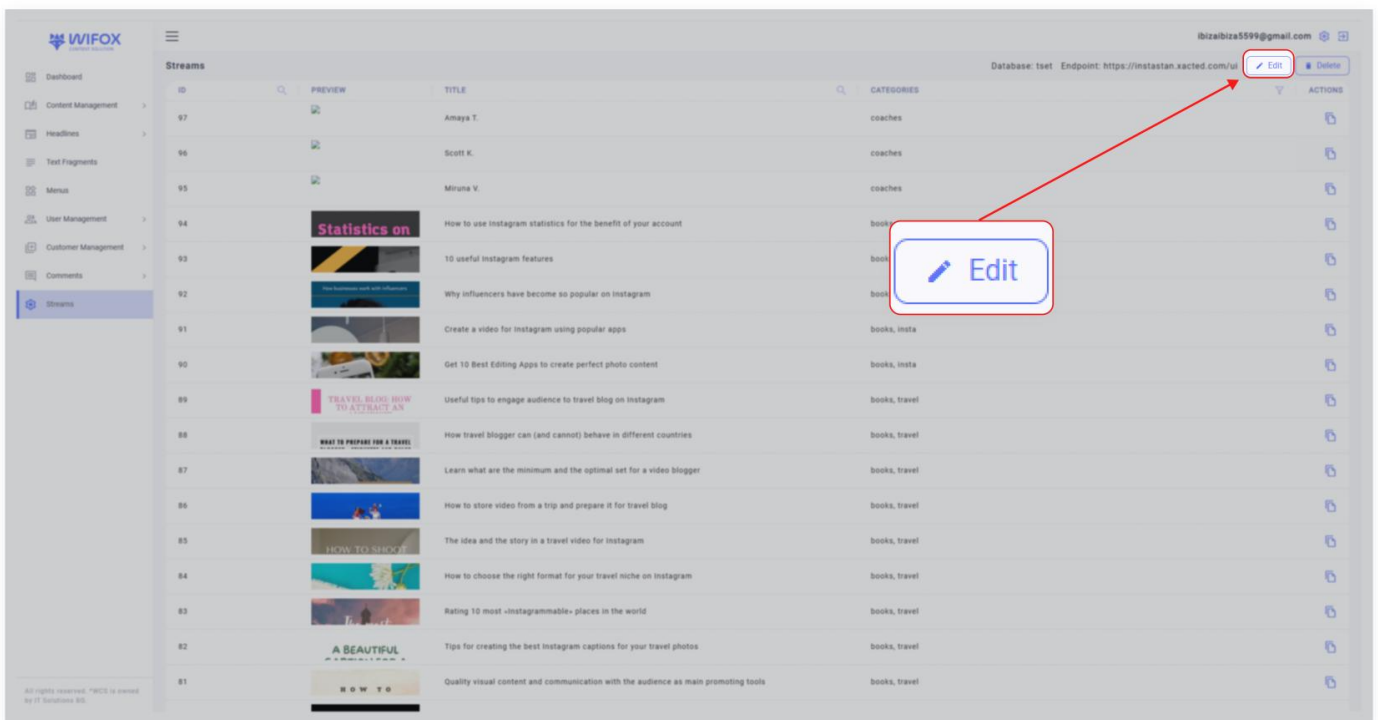

Streams automatically display data like event titles, categories, and IDs once linked.

You can only copy existing data; modifications must occur in the original database.

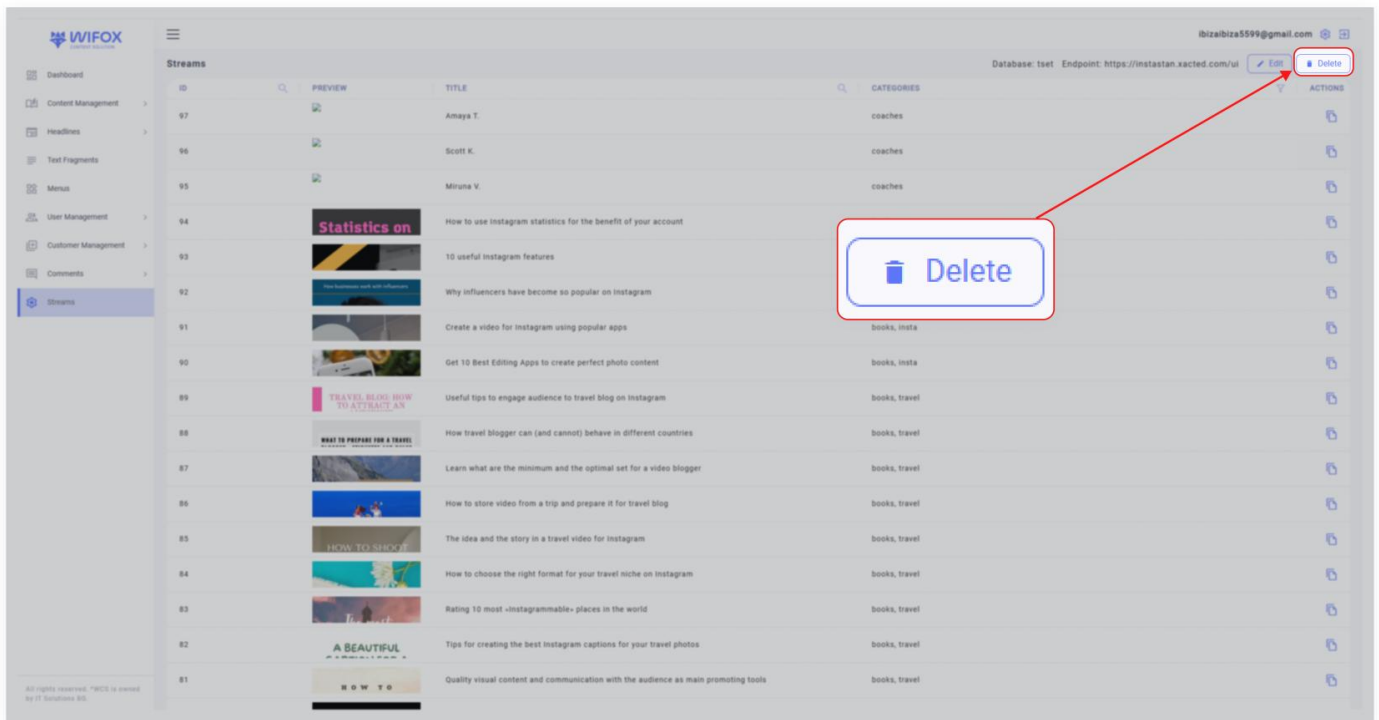

3. Editing a Stream

Click **Edit** to update the endpoint or stream settings.

Save changes to refresh the stream's connection and data.

4. Deleting a Stream

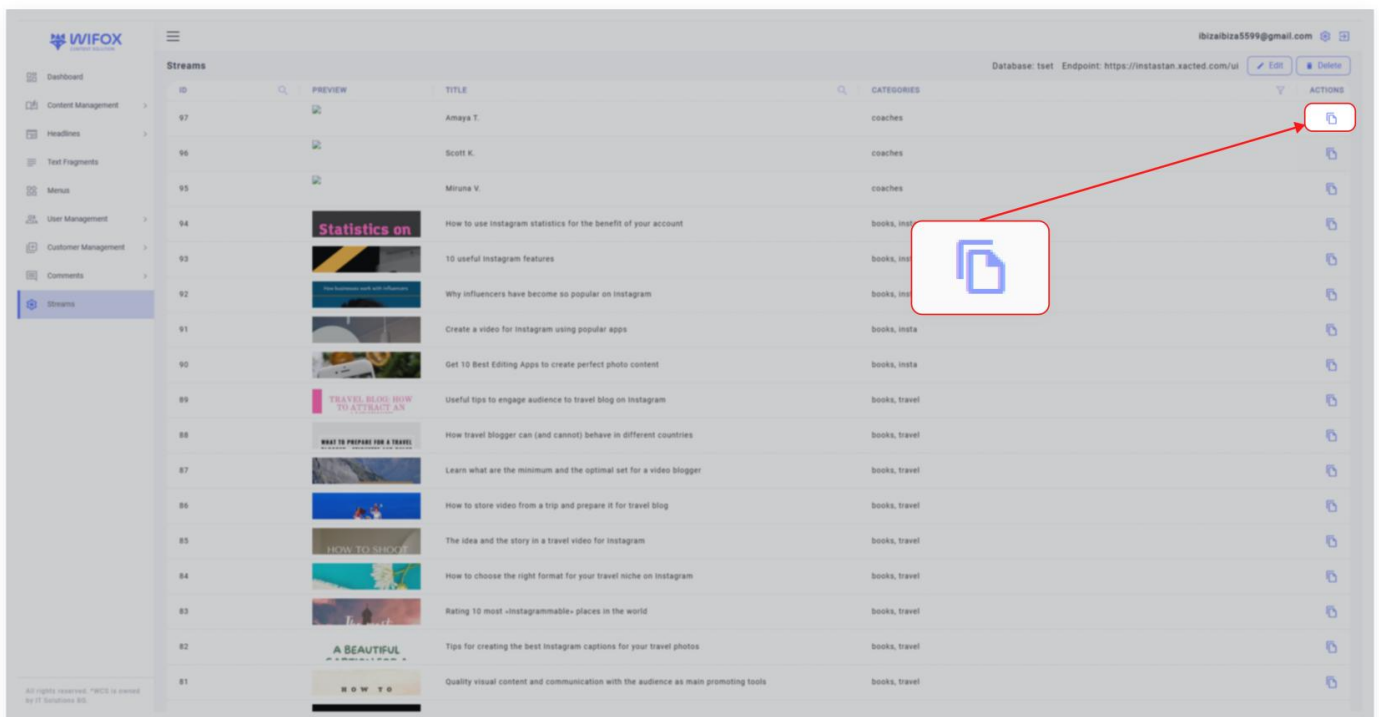

The screenshot shows the WIFOX dashboard with a sidebar on the left containing navigation options like Dashboard, Content Management, and Streams. The main area displays a table of streams with columns for ID, Preview, Title, and Categories. A red arrow points from a 'Delete' button in the 'ACTIONS' column of the first row to a larger 'Delete' button callout box. The 'Delete' button callout box is a white rounded rectangle with a blue border, containing a trash can icon and the text 'Delete'.

| ID | PREVIEW | TITLE | CATEGORIES | ACTIONS |
|----|---------|--|---------------|------------------------|
| 97 | | Amaya T. | coaches | Delete |
| 96 | | Scott K. | coaches | Delete |
| 95 | | Miruna V. | coaches | Delete |
| 94 | | How to use Instagram statistics for the benefit of your account | books, insta | Delete |
| 93 | | 10 useful Instagram features | books, insta | Delete |
| 92 | | Why influencers have become so popular on Instagram | books, insta | Delete |
| 91 | | Create a video for Instagram using popular apps | books, insta | Delete |
| 90 | | Get 10 Best Editing Apps to create perfect photo content | books, insta | Delete |
| 89 | | Useful tips to engage audience to travel blog on Instagram | books, travel | Delete |
| 88 | | How travel blogger can (and cannot) behave in different countries | books, travel | Delete |
| 87 | | Learn what are the minimum and the optimal set for a video blogger | books, travel | Delete |
| 86 | | How to store video from a trip and prepare it for travel blog | books, travel | Delete |

| 81 | | Quality visual content and communication with the audience as main promoting tools | books, travel | Delete |

Click **Delete** to remove an unnecessary stream from the list.

5. Cloning Stream Data

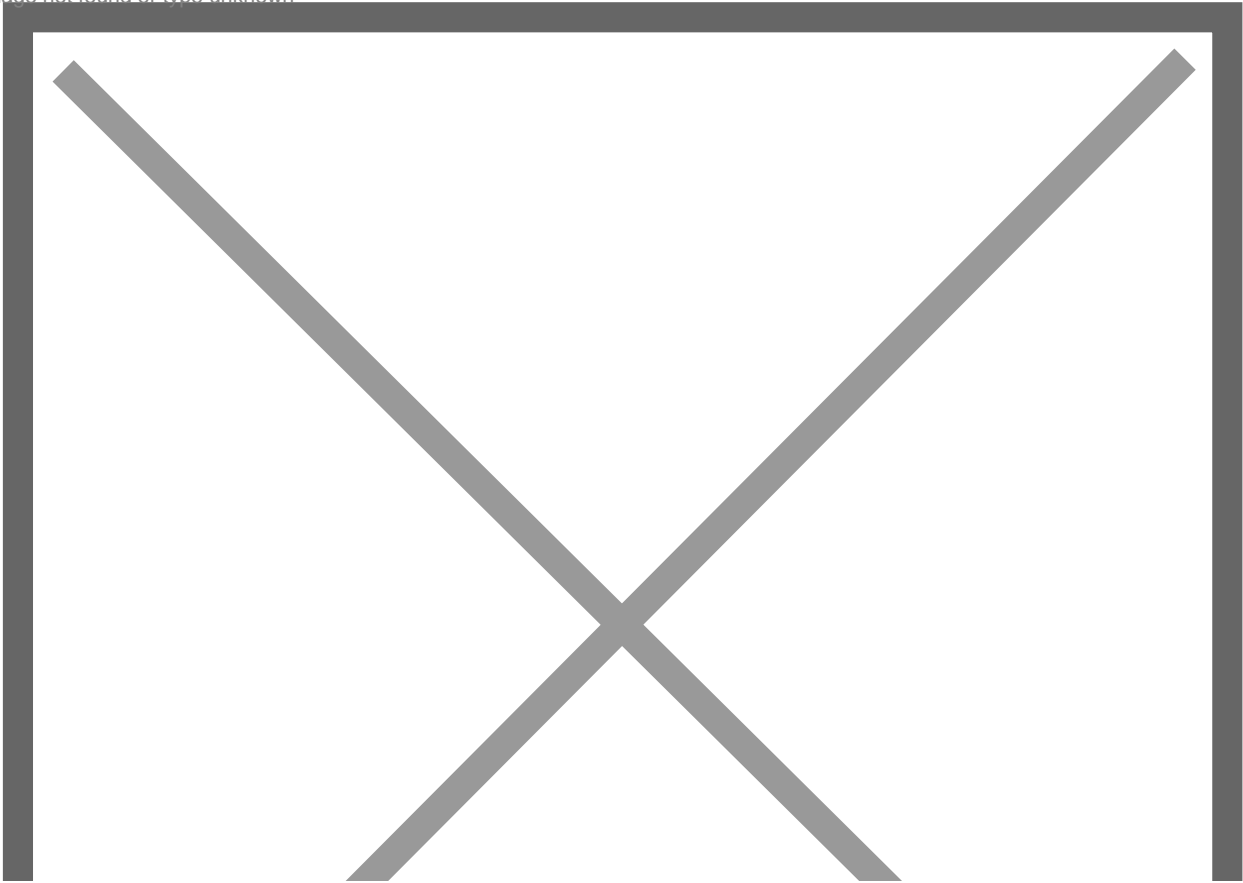

The screenshot shows the WIFOX dashboard with a sidebar on the left containing navigation options like Dashboard, Content Management, and Streams. The main area displays a table of streams with columns for ID, Preview, Title, and Categories. A red arrow points from a 'Clone' button in the 'ACTIONS' column of the first row to a larger 'Clone' button callout box. The 'Clone' button callout box is a white rounded rectangle with a blue border, containing a document icon with a plus sign.

| ID | PREVIEW | TITLE | CATEGORIES | ACTIONS |
